ECRI Institute’s Hospital Risk Assessment allows you to collect and compare data to identify strengths and opportunities for improvement. Our new assessment helps increase efficiency, standardize processes, and decrease frustration in four main areas:

- Policy review
- Interviews
- Walkrounds
- Report generation

Documents findings in the following areas:

- Critical care
- Emergency department
- Obstetrics
- Medical-surgical unit
- Surgery
- Risk and liability

Complete the entire assessment, or focus on a specific area.

Guides policy and document review. Captures demographic data and other hospital information for benchmarking purposes.

Prompts you with focused interview questions to gather feedback from providers and leaders on key risk and safety concerns.

Generates a report available via secure portal. The report includes:

- Built-in, action-oriented recommendations
- Guidance and resources that capitalize on ECRI Institute’s expertise
- Summary and overview charts to compare results and monitor progress

For additional information about the Hospital Risk Assessment call (610) 825-6000, ext. 5145, email smurphy@ecri.org, or visit www.ecri.org/insurance.
