Increase efficiency, standardize processes, and identify risks with ECRI Institute's Hospital Risk Assessment. By streamlining policy review, interviews, and walkarounds, you can easily collect data for unbiased evaluation of risks. Through automated report generation, you can compare data to identify strengths and opportunities for improvement in facilities and health systems. **Our easy-to-use, web-based tool:**

1. Guides your policy and document review as you observe practices and processes.

2. Prompts you with focused interview questions to gather feedback from providers and leaders on key risk and safety concerns.

3. Documents your key findings in specific areas in specific departments or clinical areas.

4. Automatically generates reports with pre-populated action plans, regulatory guidance, and ECRI-unique resources.

Streamline your assessment process.
